Zoning District(s): R-13 District – One Family Residential

Request
Authorization by the Chesapeake Bay Review Committee pertaining to Section 9-14(2)(b)(iv)(cc), permitted encroachments into the buffer, to construct a single-family dwelling in a portion of the one hundred (100) foot Resource Protection Area buffer.

Existing Site Conditions
The property is undeveloped. A turf lawn is maintained on the site. No forested buffer remains.

Site History
- The property was platted in 1900.
- Records and aerial photography indicate the property has never been developed.

Evaluation
Staff has reviewed the application as it relates to the Hampton Zoning Ordinance. Specifically, this application is subject to review under Section 9-14(2)(b)(iv)(cc):

Development on a lot or parcel recorded prior to October 1, 1989 when application of the buffer area results in the loss of a buildable area, the review committee may permit encroachments into the buffer area in accordance with section 9-15 of this article and the following criteria:

1. Encroachments into the buffer area shall be the minimum necessary to achieve a reasonable buildable area for a principal structure and necessary utilities;
2. Where practicable, a vegetated area that will maximize water quality protection, mitigate the effects of the buffer encroachment, and is equal to the area of encroachment into the buffer area shall be established elsewhere on the lot or parcel; and,
3. The encroachment may not extend into the waterward 50 feet of the buffer area.

Additional Considerations:

The applicant originally proposed a plan that included 1,154 SF of impervious area in the RPA buffer. The applicant worked with staff and revised the development plan to situate the house on the lot in a way that minimizes encroachment into the RPA buffer while adhering to the side yard setback requirements. The revised plan proposes 131 SF of impervious area in the RPA buffer. The plan also proposes sufficient mitigation per the Virginia DEQ Riparian Buffers Modification and Mitigation Guidance Manual to offset the proposed impervious area in the RPA buffer.

Recommendation
Staff recommends that the Committee authorize encroachment into the landward fifty (50) foot portion of the Resource Protection Area buffer subject to the following three (3) conditions:
2. Any permanent impervious area, including, but not limited to, the primary and accessory structures, parking areas, patios, decks, and porches, shall be mitigated for at the rate of one (1) unit of mitigation per every 400 square-feet, or portion thereof, of encroachment into the RPA buffer, according to the DCR Riparian Buffer Modification and Mitigation Guidance Manual.

3. Approval of this application only authorizes encroachment into the RPA buffer. All phases of the proposed development shall comply with all ordinances of the City of Hampton.
