

City of Hampton FORKLIFT Pre-Trip Inspection Checklist

Prior to operating this piece of equipment, a Pre-operational check must be conducted and documented.

Once this booklet is complete, another one must be put in its place and the completed booklet must stay with the division for up to two calendar years.

This inspection is mandatory prior to use.

If **ANY** items are checked as **NEEDS REPAIR** the equipment must be locked out and tagged out (LOTO) until it has been serviced and the repairs have been made.

If anything is broken or in need of repair, **notify your supervisor immediately**. Operating this equipment with repairs needed could result in disciplinary action and/or immediate termination.

Equipment Number:

Division:

Date:		Pre-Trip Inspection
Employee:
