

# Over-the-Counter Drugs and Medicines

## Purchasing and Getting Reimbursed for OTC Items Using Your WageWorks Account

You may use your WageWorks® Flexible Spending Account (FSA), Health Savings Account (HSA), Health Reimbursement Arrangement (HRA) to pay for over-the-counter (OTC) drugs and medicines if you get a prescription for the OTC items from your healthcare provider first.

### Here's what you need to do:

1. When you visit your healthcare provider, simply ask him or her to write you a prescription for the OTC item you use to treat your medical condition. The prescription must comply with state prescription laws, but generally, if the prescription is written on a prescription pad, it should be sufficient.
2. Your pharmacist processes the prescription. Make sure you have your prescription for OTC item filled by an IIAS pharmacy. Visit [www.sigis.com](http://www.sigis.com) for a current list of IIAS merchants.
3. You may purchase the OTC item using your WageWorks Healthcare Card. See notes below for more details.
4. If you prefer to submit a claim to be reimbursed, you need to submit both the receipt and a copy of the prescription.

### Using Your WageWorks Healthcare Card to Make OTC Purchases

You may purchase an OTC item using your WageWorks Healthcare Card if a valid prescription for the OTC item is presented at the time of purchase, and the purchase is made at a pharmacy counter and dispensed as a prescription item.

To use your card at an IIAS pharmacy, you need to present the prescription along with the OTC item to a pharmacist. The pharmacist then dispenses and processes the purchase of the OTC item in accordance with applicable law. The purchase is then classified as a prescription, and no further action is required.

If a purchase is made at a non-IIAS pharmacy, you need to submit either the receipt listing an Rx number or the prescription along with a receipt detailing the purchase for verification and to avoid having your WageWorks Healthcare Card suspended.

### OTC Item Reimbursement Eligibility

As a general rule, any OTC drug or medicine that you take orally or topically requires a prescription to be eligible for reimbursement under your WageWorks FSA, HSA, or HRA. Also as a general rule, medical devices (such as monitors), supplies (such as bandages and contact lens solution), and insulin and diabetic supplies do not require a prescription to be eligible for reimbursement.

### Summary of Common Items that Can and Cannot be Reimbursed Without a Doctor's Prescription

Can Be Reimbursed Without a Prescription	Cannot Be Reimbursed Without a Prescription
Bandages and related items (over-the-counter)	Acne treatments
